

Keppel Merlimau Cogen II Project, Singapore

- Alstom have built a new 2x400 MW gas turbine power plant for Keppel Merlimau Cogen Pte Ltd (KMC) in Singapore
- The new power plant increases KMC's production capacity to 1,300 MW, KMC's is one of Singapore's main energy providers at around 10% of the country's capacity for electricity generation.

Keppel Merlimau Cogen II Project, Singapore

- In November 2012 Kee Safety LLC, completed the installation of approximately 350 l/m of KeeWalk and KeeGuard Top Fix to an European Profiles Ltd metal profile roof.
- The project was through Indpro a Kee Safety distributor with offices in Malaysia and Singapore.
- The system is to provide safe access to the roof for maintenance of the turbine vents.
