KAISER PERMANENTE®

- Kaiser Permanente expanded the existing Data Center site in Napa California to grow with the demands of electronic medical data storage.
- The Expansion included a new Sarnafil Roof over the existing as well as the new addition at a cost of over one million dollars.
- Kaiser Permanente insisted on a Horizontal Life Line system that would not penetrate their new roof.
- Kee Safety's WireAnka system was the most cost effective method to provide protection for maintenance employees and contractors needing access to the roof areas.

Project Specific Information

- Kee Safety designed, supplied & project managed the installation of the solution.
- 553 lf of WireAnka was installed and certified by Kee Safety in one day.
- Engineering Installation Drawings are Purchased and Supplied.
- 5 Year extended warranty was purchased.

Project Information

- Over 19,000 Lbs. of materials were hoisted onto three different locations specific to the installation areas

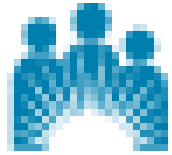

Project Information

- Three Non-Roof Membrane Penetrating Horizontal Life Lines were Installed Giving Kaiser Permanente Peace of Mind knowing their employees, contractors and roof is protected.
